

LiftMaster®

MyQ™ Enabled Accessory: Remote Light Control

Never enter a dark house again – let MyQ™ Technology get the lights for you.

The same remote that opens the garage door can also activate the lights in your home.

Provides homeowners with an added layer of freedom and control as well as security.

If coupled with the MyQ™ Internet Gateway accessory, the Remote Light Control can monitor and control lights from anywhere using the same smartphone app or online via MyLiftMaster.com.

The LiftMaster® Remote Light Control

Compatible *only* with the new generation of LiftMaster residential garage door openers enabled by MyQ™ Technology.

- Elite Series™ 8550 DC Battery Backup Belt Drive
- Premium Series™ 8360 Battery Backup Chain Drive
- LiftMaster's Remote Light Control allows homeowners to activate the home's light fixtures with a simple adaptor.
 - Lighting devices take commands from garage door opener unit or other MyQ-enabled devices using built-in two-way communication system.
- Homeowners can activate the Remote Light Control in three different ways:
 1. Program directly to LiftMaster garage door opener unit enabled by MyQ Technology
 2. Program to any of LiftMaster's new MAX 3-button remote controls
 3. Program to a MyQ Internet Gateway accessory to enable remote access to lights using a smartphone or computer
